Projects we are working on in the upcoming year

Project/research summary

• Training of UCI students, staff, faculty, and friends in the community on how to build things
• Outreach for tour groups, special events, summer programs, new initiatives, etc.
• Create workshops to get people involved
• Connect users with other manufacturing resources on campus like RapidTech if needed
Possible areas of collaboration with other groups

• Get your people trained to use the tools at FABWorks (3d printers, laser cutters, CNCs, laser scanners, etc.)

• Create small workshops for internal and external users to build skills and knowledge

• Experiment with different processes to build your parts

• House equipment you want a broad audience to have access to
