Projects we are working on in the upcoming year

Project/research summary

- Food Smart – app development for food sharing to mitigate food waste and promote sustainability.

- AR/VR/MR – using AR/VR technologies to develop solutions addressing wellness, education and training.

- PICARD (Patient Initiated Controlled Analgesic Recording Dispenser) – a smart pill bottle to avoid opioid abuse.

- Pain Buddy – Electronic Diary for pediatric pain management

- My own way – Treatment monitoring to address patients' wrong beliefs in medication efficacy.

Possible areas of collaboration with other groups

- Health & Wellness wearables (UCI Health/ embedded system)

- Mixed Reality, serious games (Informatics/Data Science/Health)

- Education and training (Connected Learning/ sustainability)
