James Russell

Director of Energy
Transition Practice

James Russell designs, launches, and oversees Distributed Energy Resources programs at CLEAResult. His current portfolio includes several residential and commercial Energy Efficiency programs, as well as pilots of connected home products and Electric Vehicle charging infrastructure. Before CLEAResult, James held positions delivering research and consulting at the intersection of energy and environment in the US, Asia and Latin America.

Jash Vora

Technical Project
Manager

Jash is a Technical Project Manager in the Data Science team at Lineage Logistics, the world's largest and most innovative temperature-controlled industrial REIT and logistics solutions provider. In this role, Jash works on evaluating and executing R&D energy and autonomous MHE technologies. He is primarily focused on deploying novel energy initiatives, from linear generators to refrigeration control platforms. Jash holds a B.S. in Energy Engineering from UC Berkeley and is a 2022 GreenBiz 30 Under 30 honoree.

Carolyn Lee
President

Carolyn Lee is the president of The Manufacturing Institute, the education and workforce partner of the National Association of Manufacturers, the nation's largest industrial trade association. In her role, Ms. Lee leads the Institute in its goal of supporting the manufacturing workforce of today and growing the manufacturing workforce of tomorrow. The Institute does so through a variety of programs designed to excite, educate and empower—with a particular focus in four key areas: women, veterans, youth and lifelong learning.

Wyatt Merrill
Technology
Manager

Wyatt Merrill is the technology manager for two Emerging Technologies (ET) subprograms: Solid-State Lighting (SSL) and Building Electric Appliances, Devices, and Systems (BEADS). Together, these portfolios span all electric end uses in buildings other than HVAC and water heating. Wyatt joined BTO in 2019 as an AAAS Science and Technology Policy Fellow. He has a Ph.D. in chemistry from the University of Wisconsin-Madison and was a 2017 recipient of the National Research Council Research Associateship Award.

John Woolsey
Principal Engineer

John is a professional mechanical engineer in California and New York specializing in energy efficiency and distributed energy resources such as solar, energy storage and combined heat and power. Over a 20-year career, he has assisted government and commercial customers in designing, evaluating and verifying energy efficiency and resiliency demonstrations and projects.
