What is Haystax?

For Investors and Accelerators, Haystax is a **Decision Intelligence Tool** that can predict a startup's fundability with **90% accuracy**, using ML, our Capital Readiness Rubric and our historical database of 80,000 data points.

AI Pitch Video Analysis

Video AI-based early Predictor

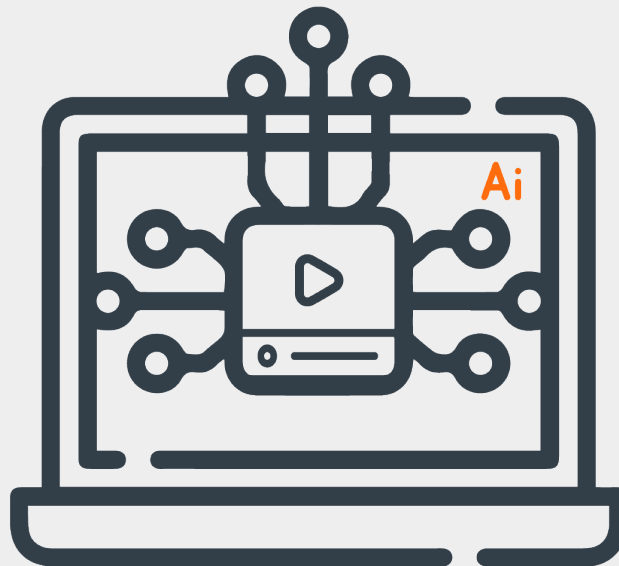

AI Pitch Video Analysis

What we are doing in the lab:

- Curating and analysing large amounts of score and video data.
- Selecting, training, and deploying ML classification models.
- Using bespoke technology to transcribe video, do speaker/transcript separation, sentiment analysis, and predictive model training from founder pitch videos.

The following demos show some of the teams early successes:

- Speaker/Transcript separation workflow.
- Transcript word clouds.
- Consolidated judge sentiment.
- Prediction Model Training Workflow

“Digitally Cracking the Video” using aiWARE

Solution

A mobile platform where people instantly help one another answer short questions through audio & video calls.

Connect With Experts Instantly

No more endless searching & uncertainty.

Get Real-Time Destination Updates

Reach out to people at specific locations.

Help Someone In Need

Pay it forward & feel good doing it.

Solution A mobile platform where people instantly help one another answer short questions through audio & video calls. Connect With Experts Instantly No more endless searching & uncertainty. Harmony Knowledge. Shared. Get Real-Time Destination Updates Reach out to people at specific locations. Help Someone In Need Pay it forward & feel good doing it. Joshua Karns 04:29 - 04:30

- Frame-level text extraction;
- Improved data accessibility;
- Context-aware processing;
- Preparation for data blending;

Speaker/Transcript Separation Workflow

Haystax[™]
powered by  octane

Highlights:

- Speaker separation and transcript separation run in parallel and in real-time.

Word Clouds

Haystax™
powered by octane

Highlights:

- Multiple word clouds can be created for comparative analysis purposes.

Consolidated Judge Sentiment

HaystaxTM
powered by octane

Highlights:

- Employ a bespoke algorithm to generate sentiment from large transcript.

Prediction Model Training Workflow

HaystaxTM
powered by octane

Highlights:

- From Founder Transcripts to deployed model.
- Speeds delivery and availability of newly trained and more intelligent models to the Haystax Cloud service.

Haystax | GPT

Haystax GPT Judge

Generative AI Decision Support Tool

Haystax GPT Judge

Haystax™
powered by octane

What it is:

- A Generative AI Decision Support Tool.
- Pretrained and Fine-Tuned.
- Takes a question (Prompt).
- Returns a score (Response).

Hypothetical Use Case:

- Determine how well a Haystax GPT Judge stacks up against the collective assessment of humans judges for a single startup.
- The Haystax GPT Judge is given a pitch video transcript and other information, and, from this, it returns a score.

Haystax GPT Judge - Use Case

Haystax™
powered by octane

What it is:

- 5 scores in agreement
- Roughly half the scores aligned with the WOTC
- Supplement human judgement, not replace it.

Takeaways:

- Game-changing technology.
- Has potential to improve existing Haystax models significantly.
- Can improve decision making support for accelerators and investors.
- Haystax implementation in POC phase.

A special thank you to Dave Beck, Brian Jenkins, Trevor Jones and all other team members from Octane and Veritone.

A big thank you to MADDO for bringing us together!
